NOTES TO SELECTED FINANCIAL STATEMENTS

QUARTER III/2025

I. OPERATIONAL CHARACTERISTICS OF THE ENTERPRISE

Sai Gon Vien Dong Technology Joint Stock Company operates under Business Registration Certificate No. 0300716891, first registered on December 9, 2003 issued by the Department of Planning and Investment of Ho Chi Minh City, registered for the 19th change on October 17, 2023.

English name: SAI GON VIEN DONG TECHNOLOGY JOINT STOCK COMPANY.

Abbreviated name: SAVITECH JSC.

Head office: 102A Pho Co Dieu, Minh Phung Ward, Ho Chi Minh City.

Branch: Branch of Sai Gon Vien Dong Technology Joint Stock Company - Hoc Mon Branch.

Branch address: 3/19 Dinh Hamlet, Tan Xuan Commune, Hoc Mon District, Ho Chi Minh City.

Stock symbol: SVT

1. Form of capital ownership:

Form of capital ownership: Joint Stock Company.

Charter capital: 173,109,780,000 VND (One hundred and seventy-three billion, one hundred and nine million, seven hundred and eighty thousand dong).

2. Business fields:

Manufacture of mechanical spare parts for vehicles, trading of commercial paper, leasing of premises, investment in education and other fields.

3. Business lines:

Manufacture and sale of components and spare parts for bicycles and motorcycles. Assembly, maintenance, and repair of bicycles and motorcycles. Processing of metal products. Design, manufacture, and repair of production equipment (excluding: mechanical processing, waste recycling, electroplating, welding and painting at the head office). Manufacture and sale of bicycles, motorcycles, automobiles, and spare parts. Manufacture and sale of raw materials, mechanical products, plastics, electrical appliances, electronics, refrigeration equipment, and handicrafts (excluding: mechanical processing, waste recycling, electroplating, welding and painting, production of glass, ceramics, porcelain, wood processing at the head office).

Manufacture and sale of paper, paper products, and materials and equipment for the paper industry. Real estate business operation. Leasing of offices, premises, and warehouses. Vocational training. Foreign language and IT training. Early childhood education. Primary, secondary, vocational, and college education. Study abroad consulting. Wholesale of books (with authorized content), and stationery.

II. ACCOUNTING PERIOD AND CURRENCY UNIT USED IN ACCOUNTING

1. Annual accounting period (starting from January 1 and ending on December 31 of each year).

2. Currency unit used in accounting

Vietnamese Dong (VND) is used as the currency unit in accounting books.

III. APPLICABLE ACCOUNTING STANDARDS AND SYSTEM

1. Applicable accounting system

The Company applies the Vietnamese accounting system issued by the Ministry of Finance under Circular No. 200/2014/TT-BTC dated December 22, 2014 and its amendments and supplements.

2. Statement of compliance with accounting standards and system.

We have performed accounting work in accordance with Vietnamese Accounting Standards (VAS) and relevant legal regulations. The financial statements have been presented fairly and reasonably, reflecting the financial position, business results, and cash flows of the enterprise.

The selection of figures and information for disclosure in the Notes to the Financial Statements has been made based on the materiality principle stipulated in Vietnamese Accounting Standard No. 21, "Presentation of Financial Statements."

3. Applicable accounting form: Vouchers for book entry.

IV. APPLICABLE ACCOUNTING POLICIES

(1) Principles for recognition of cash and cash equivalents:

Cash and cash equivalents include: Cash on hand, bank deposits, cash in transit, and short-term investments with an original maturity of no more than three months that are highly liquid, easily convertible to a known amount of cash, and subject to an insignificant risk of conversion into cash.

Methods for converting other currencies into the currency used in accounting.

Transactions during the period denominated in currencies other than Vietnamese Dong (VND) are converted at the actual transaction exchange rate at the time of the transaction, exchange rate differences are recorded as financial income or financial expenses and are reflected in the Income Statement for the period.

(2) Principles for recognition of trade and other receivables:

Principles for recognition of receivables: at original cost minus provisions for doubtful debts.

Methods of provisioning for doubtful debts: Provisions for doubtful debts are estimated based on the lost portion of the receivables that are overdue or not yet overdue but may not be collectible due to the debtor's inability to pay.

(3) Principles for recognition of inventories:

Principles for recognition of inventories: Inventories are recognized at original cost minus (-) provisions for devaluation and provisions for obsolete or degraded inventories. The original cost includes purchase price, processing costs, and other directly related costs incurred to bring the inventories to their current location and condition.

Methods of calculating inventory value: According to weighted average cost.

Inventory accounting: Regular declaration method.

Methods of provisioning for devaluation of inventories: Provisions for devaluation of inventories are made when the net realizable value of inventory is lower than its original cost. Net realizable value is the estimated selling price less the estimated costs to complete the product and the estimated selling expenses. The provision amount is the difference between the original cost of inventory and its lower net realizable value.

(4) Principles for recognition and depreciation of fixed assets (FA):

Methods for recognition of tangible fixed assets:

Tangible fixed assets are recognized at cost less (-) accumulated depreciation. Cost includes all expenses incurred by the enterprise to acquire the fixed asset up to the point it is ready for its intended use. Costs incurred after initial recognition are added to the fixed asset's cost only if they are certain to increase future economic benefits from using the asset.

Costs that do not meet these conditions are recognized as expenses in the period.

When fixed assets are sold or disposed of, the cost and accumulated depreciation are derecognized, and any resulting gain or loss from the disposal is recorded as income or expense in the period.

Tangible fixed assets procured:

The cost of tangible fixed assets includes the purchase price (less (-) any trade discounts or rebates), applicable taxes (excluding refundable taxes), and directly related costs incurred to bring the asset to its intended use, such as installation, trial runs, consultancy, and other directly related expenses.

Methods for recognition of intangible fixed assets:

Intangible fixed assets are recognized at cost less (-) accumulated depreciation. The cost of an intangible fixed asset includes all expenses incurred by the enterprise to acquire the intangible asset up to the time it is ready for its intended use.

Computer Software

Computer software expenses include all expenses incurred by the Company up to the time the software is put into use.

Methods for depreciation of fixed assets:

Fixed assets are depreciated using the straight-line method based on their estimated useful lives. The estimated useful life is the period during which the asset contributes to production or business activities.

Estimated useful lives of fixed assets are as follows:

<i>Buildings and structures</i>	<i>5 - 25 years</i>
<i>Machinery and equipment</i>	<i>4 - 10 years</i>
<i>Means of transport and transmission</i>	<i>10 years</i>
<i>Management tools and equipment</i>	<i>5 - 10 years</i>
<i>Other fixed assets</i>	<i>8 - 10 years</i>
<i>Intangible fixed assets</i>	<i>6 years</i>

(5) Principles for recognition of financial investments:

Principles of recognition of investments in associates: are recognized when the Company holds 20% to less than 50% of the voting rights in the invested Companies and has significant influence over financial and operational policy decisions. These investments are reflected in the Financial Statements using the cost method.

Principles for recognition of short-term and long-term securities investments, other short-term and long-term investments: These investments include bonds, stocks, loans, or capital that the company is investing in projects or in other economic organizations established in accordance with the law which only hold less than 20% of the voting rights, and the recovery period is less than one year (short-term investments) or more than one year (long-term investments). These investments are reflected in the Financial Statements using the cost method.

Methods of provisioning for devaluation of financial investments:

Provisions for devaluation of short- and long-term investment securities are made when the net realizable value (market value) of the investment securities falls below their cost. If the market value of the securities cannot be determined, no provision is made.

Provision for losses on long-term financial investments is made when the Company determines that these investments have decreased in value permanently and unexpectedly due to losses in the operating results of the invested companies.

The provision amount is determined as the difference between the realizable net value (market value) or the recoverable value of the investment and the original cost recorded in the accounting books of the investments.

(6) Principles for recognition and capitalization of borrowing costs:

Principles for recognition of borrowing costs: Interest and other costs directly related to the company's borrowings are recognized as production and business expenses during the period, except when these costs arise from borrowings directly attributable to the investment in construction or production of an unfinished asset, which are included in (capitalized into) the value of that asset when meeting the conditions specified in accounting standard No. 16 "Borrowing costs".

Capitalization rate used to determine borrowing costs capitalized during the period: In cases of general borrowings partially used for the investment in construction or production of an unfinished asset, the borrowing costs eligible for capitalization during each accounting period are determined based on the capitalization rate applied to the weighted average cumulative costs incurred for the investment in construction or production of the asset. The capitalization rate is calculated as the weighted average interest rate of the company's outstanding borrowings during the period. Borrowing costs capitalized during the period must not exceed the total borrowing costs incurred during that period.

(7) Principles for recognition and capitalization of other expenses:

Short-term and long-term prepaid expenses at the company include: tools, equipment, management materials, and other costs associated with production and business activities of multiple accounting periods that require allocation.

Methods for allocation of prepaid expenses: Prepaid expenses are calculated and allocated to production and business expenses of each period using the straight-line method. Depending on the nature and extent of each type of expense, the allocation period is as follows: Short-term prepaid expenses are allocated within 12 months; Long-term prepaid expenses are allocated over a period of 12 to 24 months.

(8) Principles and methods for recognition of accrued expenses:

Accrued expenses: are recognized based on reasonable estimates of amounts payable for goods and services used during the period, including expenses such as production electricity expenses, employee lunch allowances, audit fees, and other similar expenses.

(9) Principles for recognition of owner's equity:

Principles for recognition of owner's investment capital:

Business capital is formed from the funds contributed by shareholders through the purchase of shares or stocks, or is supplemented by after-tax profits according to the Resolution of the General Meeting of Shareholders or the provisions in the Company's Charter. Business capital is recognized based on the actual capital contributed in cash or assets calculated according to the par value of issued shares during the company's establishment or subsequent fundraising activities to expand its operations.

Principles for recognition of capital surplus:

Capital surplus: Reflects the positive difference between the actual amount received and the par value when shares are issued for the first time or additionally, and the increase or decrease in the difference between the actual amount received and the repurchase price when treasury shares are reissued. If shares are repurchased and immediately canceled on the repurchase date, the value of the shares is deducted from business capital at the actual repurchase price, and the business capital is reduced by the par value and the capital surplus of the repurchased shares.

Principles for recognition of undistributed profits:

Principles for recognition of undistributed profits: are recognized as the profit (or loss) from the business results of the enterprise after deducting (-) the corporate income tax expenses for the current period and adjustments for retroactive application of changes in accounting policies and retroactive adjustments of material errors of previous years.

The distribution of profits is based on the Company's charter and approved annually by the General Meeting of Shareholders.

(10) Principles and methods of revenue recognition:

Principles and methods for recognition of sales revenue:

Sales revenue is recognized when the following five conditions are simultaneously met: 1. The company has transferred most of the risks and rewards associated with the ownership of the goods or products to the buyer; 2. The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods; 3. Revenue can be reliably measured; 4. The company has received economic benefits from the sales transaction; 5. Costs associated with the sales transaction can be determined.

Principles and methods for recognition of service revenue:

Revenue from service transactions is recognized when the outcome of the transaction can be reliably determined. For multi-period service transactions, revenue is recognized based on the portion of work completed as of the balance sheet date for that period. The outcome of a service transaction is determined when all the following four conditions are met: 1. Revenue can be reliably measured; 2. Economic benefits from the service transaction are probable; 3. The work completed as of the balance sheet date is measurable; 4. The costs incurred for the transaction and the costs to complete the service transaction can be reliably determined.

If the outcome of a contract cannot be reliably determined, revenue is recognized only to the extent that the incurred costs are recoverable.

Principles and methods for recognition of financial revenue:

Financial revenue reflects revenue from interest, distributed dividends and profits and other financial revenue of the enterprise...

Revenue from interest, distributed dividends and profits is recognized when both the following conditions are met: 1. Economic benefits from the transaction are probable; 2. Revenue can be reliably measured.

- Interest is recognized based on the time and the actual Interest rate for each period.
- Distributed dividends and profits are recognized when shareholders are entitled to receive dividends or capital contributors are entitled to receive profits from capital contributions.

If a previously recognized revenue amount becomes unrecoverable or uncertain, it is accounted for as an expense in the period incurred and not deducted from revenue.

(11) Principles and methods for recognition of financial expenses:

Financial expenses include: Expenses or losses related to financial investment activities, borrowing costs, associated capital contribution costs; Provisions for devaluation of financial investments and other financial expenses.

Financial expenses are recognized in detail for each cost item when they are incurred during the period and are reliably measured when there is sufficient evidence of these expenses.

(12) Principles and methods for recognition of current corporate income tax expenses:

Corporate income tax expenses include the total current corporate income tax expenses and deferred corporate income tax expenses when determining the profit or loss of an accounting period

Corporate income tax expenses: represent the corporate income tax payable (or recoverable) calculated on taxable income and the corporate income tax rate for the current year according to the current corporate income tax law recorded.

Taxes payable to the state budget will be specifically settled with the tax authority. The difference between the tax payable according to the books and the settlement figures will be adjusted when there is an official settlement with the tax authority.

Tax policy according to the conditions applicable to the Company in the current year is as follows: The Company applies a corporate income tax rate of 20% and a preferential tax rate of 10% for each different business sector and industry.

1. Cash and cash equivalents	End of the period	Beginning of the year

TOTAL	544,027,990	-	150,000,000	-	544,027,990	150,000,000

The fair value of financial assets and financial liabilities reflects the value at which financial instruments can be exchanged in a current transaction between participants, excluding forced sales or liquidations.

The Company uses the following methods and assumptions to estimate fair value:

The fair value of cash, trade receivables, trade payables, and other short-term liabilities is equivalent to their carrying amounts due to the short-term nature of these instruments.

The fair value of listed securities and financial debt instruments is determined based on market value.

The fair value of securities and financial investments for which fair value cannot be reliably determined, due to the absence of a highly liquid market, is presented at their carrying amounts.

If fair value is not estimated using the discounted cash flow method, it is presented as follows:

Except for the items mentioned above, the fair value of financial assets and financial liabilities has not been formally evaluated or determined as of January 1, 2025, and September 30, 2025. However, the Company's Board of General Directors assesses that the fair value of these financial assets and liabilities does not significantly differ from their carrying amounts as of the financial year-end date.
