2. Content of disclosed information:

- Based on the Circular No. 96/2020/TT-BTC guiding the disclosure of information on the securities market.

Sai Gon Vien Dong Technology Joint Stock Company hereby explain the difference between the Financial Statements of the first quarter of 2026 and the Financial Statements of the same period of the immediately previous year, specifically as follows:

Contents	Business performance		Difference
	Quarter 1/2026	Quarter 1/2025	
Net revenue from goods sale and service provision	6,983,321,003	681,818,181	+ 6,301,502,822
Profit after tax	253,121,193	4,821,442,356	- 4,568,321,163

*This is an English version. If there is any discrepancy or different understanding between the Vietnamese version and the English version, the Vietnamese version shall prevail.*

Reasons for the difference:

The business performance of the first quarter of 2026 compared to the same period last year show significant changes in both revenue and profit because of the impact of many subjective internal and objective external factors, specifically as follows:

\* Revenue increased from the general education, which has been officially deployed since the beginning of the 2025-2026 school year (from August 2025 to present) in accordance with the Board of Directors' restructuring plan.

\* Currently, the global energy crisis has negatively impacted most economies, including Vietnam. To focus financial resources on the company's operations amidst rising raw material prices, interest rates, exchange rates, etc., the partners invested by the company have suspended dividend payments in the first few months of 2026. Consequently, financial income for this period decreased significantly compared to the same period last year. However, the overall performance of the company remains profitable.
